# DOCUMENT SECURITY EDGE 65G SECURE CART

The EDGE 65 is a 65-gallon cart which can handle up to 230 pounds of material. The forward-facing, deep deflector pocket prevents visibility and access to contents. The secured lid fully wraps around with an overhang of 1 ¼", preventing entry into lid corners and maximizing content security. All this makes the EDGE The Most Secure Lid in the Document Destruction Industry. Made of high-density polyethylene, the EDGE is injection-molded for increased durability, security and container longevity. The EDGE 65's 10" Super Cushion Rubber Wheels are the most modern and quiet in the industry.

Designed specifically for document destruction.

## FEATURES

- Manufactured in North Carolina USA
- Made with recycled plastic and 100% recyclable
- Wrap around lid prevents edge lift
- Large handles for easy handling
